

Legend™ 5L ST Insecticide

(Thiamethoxam)

- **NEW, BROAD-SPECTRUM INSECTICIDE**
- **TARGETS INSECTS AT BOTH SOIL & FOLIAR LEVELS**
- **DELIVERS ENHANCED HANDLING, STABILITY, PERFORMANCE, VALUE**
- **RESULTS: INCREASED ROOT MASS, GREATER STANDS, EARLIER CANOPIES & TALLER, GREENER PLANTS**

Legend™ contains the active ingredient thiamethoxam, the same active ingredient found in Cruiser® 5FS.

BELOW GROUND

Binds to soil material around the roots and remains in the root zone—acting as a reservoir before root uptake through the soil.

ABOVE GROUND

Better foliar insect protection compared to imidacloprid.

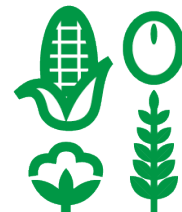

LOWER USE RATES

Legend™ is a water-based formulation, so it takes less water to activate it. With maximal effectiveness at a minimal use rate, you get enhanced value, especially when used in custom seed treatment blends.

MORE ROBUST TREATMENT BLENDS

A low use rate gives you the ability to add more enhancements to the treatment blend—like extra polymer, a biological or even another fungicide.

WORKS ON RANGE OF CROPS

Compared to imidacloprid or clothianidin, Legend™ delivers even more value due to its efficacy on a range of crops, including soybeans, corn, wheat, cotton and more.

BLENDABLE IN UAS SEED TREATMENTS
