

Seed treatment for enhanced nitrogen fixation and phosphorous solubilization.

USE RATE: 2 fl. oz/CWT

PACKAGE SIZE: 6x40 (treats 240 units)

LIFE ON SEED: 30 days

BACTERIA 1

UAS N-Gage Nitro consists of two endophyte bacteria that live inside the plant, not in the soil.

Lives above ground in the leaves.

Grows in the stoma. When your plant breathes, N-Gage pulls nitrogen out of the air and into your crop—greatly increasing your nitrogen availability.

BACTERIA 2

Lives below ground in the roots.

Causes the root to solubilize phosphorus that is tied up in the soil.
